Education

Sanjay Ghodawat Institute, Atigre

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

CGPA: 7.92/10.0

Technical Skills

Programming: Java, Python, JavaScript, C, C++, SQL

Web: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, Node.js, Express.js

Database: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Postman, npm

Core: Data Structures Algorithms, OOP, REST APIs

Experience

Software Development Intern

Aug 2026 – Present

Thiranex Technologies

Remote

- **Selected as a Software Development Intern** to gain hands-on experience in modern web development technologies.
- Participating in technical training sessions covering frontend, backend, and full-stack development concepts.
- Learning industry-standard development workflows, version control using Git, and collaborative software development practices.
- Building practical projects to strengthen problem-solving and software engineering skills.

Projects

NeuroPain Care AI | *React.js, Node.js, Express.js, MongoDB, Python*

March 2025 – April 2025

- **Developed an AI-powered healthcare application** for monitoring pain patterns and emotional well-being.
- Designed an interactive body map to enable users to log pain intensity, affected body parts, and symptoms.
- Built responsive frontend interfaces using React.js, Tailwind CSS, and Bootstrap for an enhanced user experience.
- Integrated RESTful APIs with MongoDB to securely store and manage user health data.
- Collaborated in a team environment using Git and GitHub, following modern software development practices.

Smart Tourist Safety Monitoring & Incident Response System | *React.js, Node.js, Express.js, MongoDB, MySQL, Google Maps API*

- **Developed an AI-powered tourist safety platform** featuring real-time location tracking, automated SOS alerts, and emergency response services.
- Integrated Google Maps API, live weather updates, AI travel assistance, and safe-route recommendations for a personalized travel experience.
- Built secure backend APIs using Node.js, Express.js, MongoDB, and MySQL for user authentication, incident reporting, and data management.
- Collaborated with a 4-member team using Git and GitHub to design, develop, and test the application following modern software development practices.

Professional Development

- **Java Programming Certification – Disha Computer Institute:** Successfully completed a comprehensive training program covering object-oriented programming, data structures, and core Java concepts.
- **C++ Programming Certification – Disha Computer Institute:** Completed hands-on training in C++ programming, including problem-solving, object-oriented programming, and fundamental algorithms.
- **Docker & Golang Technologies Workshop – Walchand College of Engineering:** Participated in a technical workshop focused on containerization with Docker and backend development concepts using Golang.
- **Hackathon Participant – DKTE College of Engineering:** Collaborated with a team to design and develop an innovative software solution within a limited time, strengthening problem-solving and teamwork skills.
